SARAH'S QUICK SHOPPING TIPS

Buy the fat.

80/20 ground beef, not 90/10. Fatty cuts keep you full and cost less per calorie. Your body runs on fat now.

Costco is your friend.

Buy ground beef, eggs, and butter in bulk. Freeze what you don't use this week. A chest freezer pays for itself in two months.

Don't skip salt.

Your kidneys dump sodium on carnivore. If you're getting headaches, cramps, or brain fog, it's almost always salt. 2-3 tsp per day is a good starting point.

Organ meats aren't optional.

Even 2-3 oz of liver per week covers your vitamin A, B12, copper, and folate. Blend it into ground beef if the texture bothers you.
